

INTERNATIONAL INSTITUTE
OF COFFEE TASTERS

M1 - Espresso Italiano Tasting (19 Oct 2015)

Learn how to recognize and evaluate the true Italian Espresso

Making a perfect espresso is not a simple task. A large number of variables has to be kept under control: the coffee blend, the coffee grinder, the espresso machine and the barista's hand of course.

Every single variable will influence the final result: the assessment of the cup quality is up only to the taster.

Learn how to distinguish good Italian espresso from poor one and how to get a precise sensory profile of the cup in front of you.

Contents

- espresso tasting: aims, environmental and psychological conditions of tasting;
- the judgment of the senses: the visual, aromatic and gustative-tactile evaluation;
- the tasting card: what it is and how to use it;
- the geography of coffee production and consumption, the coffee growing and harvesting, the coffee processing
- coffee roasting and its chemical and organoleptical transformations, the packaging methods and their influence on the conservation of aromas, the blend and its influence on the final cup;
- the coffee grinder and the espresso machine: different types, how to choose them, how to use them to get always a perfect espresso, how to maintain them.

Improve your tasting skills

You will taste and judge different espressos based on different blends and single origins and prepared in different ways. You will even taste faulty espressos to learn to distinguish top-quality espresso from defective one.

Espresso tasting license

At the end of the class you can take the exam to get the tasting license.

Date
